

PRP

Platelet-Rich Plasma

Your Blood. Your Healing!

Now offering PRP therapy!

Don't just mask the problem, heal it!

Treatment for:

- Plantar Fasciitis
- Tendinitis
- Arthritis
- Neurological Conditions
- Sprains
- Chronic Pain
- Tissue inflammation
- Wounds and more...

Regenerative medicine is a form of treatment that uses the body's natural cells and mechanics to heal damaged or painful muscles, tissues, ligaments, nerves and bones.

Regenerative therapy helps alleviate pain and boost healing using regenerative properties (cells, platelets, plasma, etc.) from the body. Regenerative medicine at Arizona Foot & Ankle Surgery includes the use of platelet-rich plasma (PRP) injections to help patients find relief from their chronic musculoskeletal pain, arthritis, ligament and muscle tears, wounds or tissue inflammation.
